Technical SEO, SEM, Core Web Vitals, UTM Attribution

Integrations: REST APIs, Webhooks, WhatsApp Business API, Voximplant, Escala CRM, Google Apps Script, JSON

Tools & Methodologies: Git, Scrum, Trello, Figma, Balsamiq

PROFESSIONAL EXPERIENCE

FULL STACK WEB DEVELOPER / MARTECH SPECIALIST
Geosatelital Perú E.I.R.L. — Lima, Peru | September 2025 – Present

- Conducted technical SEO and performance audits across websites in Peru and Ecuador, resolving indexing issues and optimizing infrastructure to improve Core Web Vitals scores and increase organic lead generation.
- Designed and developed custom PHP middleware to integrate TikTok Ads campaigns and web forms with Escala CRM through REST APIs, eliminating recurring costs for third-party tools such as Zapier or Make and ensuring real-time synchronization of 100% of leads.
- Implemented an end-to-end attribution system that captures dynamic UTM parameters from the URL and passes them to the back end through hidden form fields and JavaScript, alongside GTM and GA4, to accurately measure advertising return on investment (ROI).
- Automated the consolidation of marketing metrics (Meta Ads and Google Ads) and sales data through a Google Apps Script API that transforms data into JSON and feeds a custom web dashboard to monitor the sales funnel and lead contact rates.

FULL STACK WEB DEVELOPER
Tecnología Flexográfica S.A.C. — Lima, Peru | November 2023 – September 2025

- Developed and maintained the corporate web platform using WordPress, PHP, and CSS, managing the front-end interface, server-side logic, and databases.

- Led the initial setup of the company's digital measurement infrastructure, implementing Google Tag Manager (GTM) and Google Analytics 4 (GA4) to track traffic and user behavior.
- Managed DNS and subdomain configurations and set up database environments for quality assurance (QA) before production deployments.

FRONT-END DEVELOPMENT / UI-UX INTERN
Hidrosvel Service — Lima, Peru | January 2022 – March 2022

- Collaborated on navigation flows and wireframes using Figma and Balsamiq to deliver user-centered interfaces (UI/UX).
- Created structured technical documentation for the interfaces and components developed, supporting team handovers and code scalability.
